

SAMUEL BALDASSO

Software Engineer · Java Backend, Full-Stack & Mobile

Brazil (Remote-ready) · baldassosamuel93@gmail.com · linkedin.com/in/samuel-baldasso · github.com/samuelbaldasso

SUMMARY

Software Engineer with 4+ years of experience spanning Java backend, native mobile (Android/Kotlin, Flutter), and front-end (React, Angular) work across IBM, CI&T, and NTT DATA. Recent focus on Java backend microservices (Spring Boot, Quarkus) and event-driven architectures (Kafka, Transactional Outbox), currently full-stack on a Java + React project. Comfortable with ambiguity and cross-functional collaboration in distributed, remote environments. Fluent in English (C1).

TECHNICAL SKILLS

Backend: Java, Spring Boot, Quarkus, REST APIs, Microservices, JAX-RS, Kafka, Distributed Systems

Mobile: Android (Kotlin, Jetpack Compose), Flutter

Front-end: React, Next.js, Angular

Infra & Data: AWS, Azure, Docker, CI/CD, PostgreSQL, MySQL, MongoDB

Testing: JUnit, Mockito, Testcontainers

EXPERIENCE

Backend / Full-Stack Software Engineer

May 2025 – Present

IBM · Enterprise Consulting (Bradesco client — E-AGRO project)

- Working on Java microservices (Spring Boot, JAX-RS) on the E-AGRO platform, including work on high-volume data handling and observability.
- Contributed to a separate TypeScript/Node.js project (DASA) before returning to E-AGRO as full-stack, now also working with React.
- Contribute to architecture discussions and code reviews in a distributed, cloud-native environment.

Tech: Java · Spring Boot · Quarkus · TypeScript · Node.js · React · AWS · Docker · PostgreSQL · MongoDB

Consulting Projects — Backend & Full-Stack Java

Oct 2024 – Apr 2025

Independent contracts (SBM Technology, CI&T, Montreal Informática), interspersed with periods of job search

- SBM Technology (Oct–Nov 2024) — Java/Angular development, mid-level.
- CI&T (Jan–Feb 2025) — backend engineer on a project for Vivo; refactored bottlenecks in critical business workflows and strengthened CI/CD pipelines.
- Montreal Informática (Apr 2025) — backend API design and optimization focused on throughput, latency, and fault tolerance.

Tech: Java · Spring Boot · Angular · CI/CD · PostgreSQL

Software Engineer (rotated across multiple projects)

Apr 2022 – Oct 2024

NTT DATA

- Allianz — first professional Java work: Java EE integrated with legacy IBM DB2/COBOL systems, alongside Angular (v14) front-end.
- Bees Force (AbInBev) — native Android (Kotlin, Jetpack Compose, Clean Architecture) for a corporate B2B field app used across the AbInBev ecosystem.
- Allianz Auto — Flutter, app with a large nationwide user base.
- RD Saúde — React/Next.js front-end, micro frontend architecture.
- Started as an Android development intern; promoted to Junior Engineer within 6 months.

Tech: Java · Kotlin · Flutter · Angular · React/Next.js

PROJECTS

Banking Ledger Core System — github.com/samuelbaldasso

Learning project implementing a double-entry ledger with Clean Architecture and DDD.

- Implemented Transactional Outbox Pattern (Kafka + PostgreSQL), double-entry validation, pessimistic locking with deadlock-free ordering, AES-256 encryption at rest, and OAuth2/JWT via Keycloak.

Tech: Java 21 · Spring Boot · Kafka · PostgreSQL · Keycloak · Docker · Flyway · Clean Architecture · DDD

Java Subscription Platform — github.com/samuelbaldasso

Learning project exploring 6 distributed-systems patterns in a B2C subscription system.

- Applied Transactional Outbox, Optimistic Locking, Kafka idempotency, Redis caching, and Resilience4j circuit breakers in a single cohesive system.
- Full billing lifecycle (trial, renewal, cancellation) with event-driven async processing and Testcontainers integration tests.

Tech: Java 17 · Spring Boot 3 · Kafka · Redis · PostgreSQL · Resilience4j · Testcontainers · Docker

EDUCATION

Bachelor's Degree in Information Technology

FeMASS — Macaé, Brazil

LANGUAGES

English — Full Professional Proficiency (C1)

Spanish — Professional Working Proficiency (B2)
